6. Women’s Health
7. Mental Health
8. Allied and Community Health Services
9. Routine Antenatal Referrals
10. Routine Diabetes Team Referrals

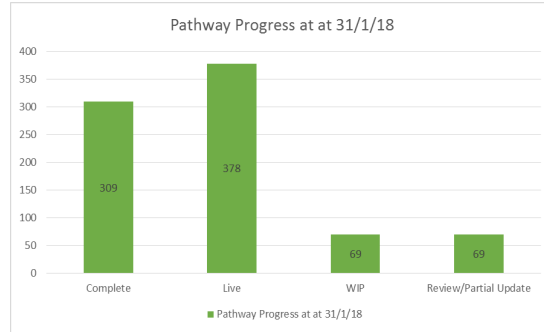

HealthPathways Upcoming Projects

The ACT & SNSW HealthPathways team is continuously working towards updating, reviewing and localising new pathways.

The team is also collaborating with a range of clinical and advocacy organisations on a suite of LGBTQIA+ pathways to go live later in the year.

In partnership with the Canberra Hospital Health Services, the ACT & SNSW team will be working on a pathway to assist the trans-border patient journey between ACT & SNSW health services.

Pathways Live (Jan 2018)

Clinical Stream	Pathway
Breastfeeding	Sore, Tender, and Damaged Nipples
Podiatry	Corns and Calluses
Breastfeeding	Domperidone as Galactagogue

Program Engagement

On the 24th of January the ACT HealthPathways Team attended the Intern Orientation at Canberra Hospital. The interns were particularly interested in the Assessment guidelines and referral options available in both the ACT and SNSW. These interns are likely to be embedded in ACT or SNSW and recognised the importance of strong collaboration between the regions.
