Course in Wound Closure (10762NAT)

During the two-day workshop topics and activities will include:

- Wound assessment
- Identifying and managing different types of wounds
- Using local anesthetic
- Closure methods and selection of appropriate materials
- Simulated wound closure
- Simulated assessment tasks
- Documentation and follow up and referral.

Types of suturing will include: single interrupted, vertical mattress, skin flap closure, subcuticular deep, and superficial closure including closing biopsy and excision sites.

Course delivery and assessment for the Course in Wound Closure includes a two-day face-to-face workshop, in-class activities assessed by facilitator, a mandatory observed workplace activity and an online assessment completed via BenchmarkIQ.

To achieve competency in this course, students must demonstrate competency through realistic skills simulations and competently complete a theory assessment covering essential knowledge and skills. There is no pre-reading and all course materials are supplied. The online assessment activities are not started until after attendance at the two-day workshop.
