

Position description	
Position title	Data Analyst
Business unit	Planning and Policy
Employment	<input checked="" type="checkbox"/> Full-time
Accountability	Accountable to the Manager Data and Reporting
<p>About Capital Health Network</p> <p>Capital Health Network’s purpose is to work in partnership to integrate health care, strengthen health equity and improve health outcomes. We address community needs by collaborating with consumers, members, funders, researchers and health and community partners to improve health outcomes. We are unique in our ability to support general practice and to design services that fill gaps and deliver lasting improvements.</p> <p>Capital Health Network values and Competency Framework</p> <p>People who work for CHN will work with us to achieve our aspirational goals of Agility, Diversity and Empowerment. All employees are required to meet CHN’s seven competencies at a level appropriate to their role.</p> <p>To articulate organisational expectations in relation to the values and the competencies expected of all employees, a Competency Framework has been developed. The framework identifies and describes seven basic competencies that all employees need to have to function effectively in their role at CHN.</p> <p>To download a copy of the Competency Framework, follow the link: Competency Framework</p>	
Responsibilities	
Primary purpose of position	The Data Analyst is responsible for providing advice and undertaking activities that ensure the high-quality analysis and reporting of health data that will assist with planning, monitoring and/or evaluating new and/or existing health services in the region. This role will also work with CHN program staff, ACT Health and other stakeholders as required to facilitate data sharing, increased health intelligence and data-driven capability development in the ACT.
Duties	<ol style="list-style-type: none"> Undertake data analysis, interpretation as required to support CHN’s business needs, including the development of the Health Needs Assessment and the Activity Work Plans. Identify, collate, interpret, analyse and prepare population-based and epidemiological data to inform the regional population needs assessment, local priority setting, population health planning, service improvement initiatives and program/service evaluation. Support the Quality Improvement team with the data analysis and reporting of the general practice data collected on the Primary Health Insights Data Platform. Support CHN programs with data analysis and reporting. Prepare written reports, articles and oral presentations as required. Assist with the evaluation of commissioned services by analysing collected data to ensure commissioned services are addressing areas of need and quality improvements. Other duties consistent with the classification level, as directed.
