Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

This activity aims to ensure access to COVID-19 vaccinations for at-risk groups.

Description of Activity *

This activity will support vaccination efforts through specific in-reach, promotion, and support for:

- those who are experiencing homelessness
- people with disability or are frail and cannot leave home
- culturally, ethnically and linguistically diverse people
- those who are not eligible for Medicare and/or live in an area without access to a state, territory or Commonwealth Vaccination Clinic;
- aged care and disability workers.
- Residential Aged Care Facilities

This activity will support vaccination efforts through specific in-reach, promotion, and support for:

- those who are experiencing homelessness
- people with disability or are frail and cannot leave home
- culturally, ethnically and linguistically diverse people
- those who are not eligible for Medicare and/or live in an area without access to a state, territory or Commonwealth Vaccination

Clinic;
-aged care and disability workers

The activity has been expanded and not limited to in-reach locations. General Practices and Pharmacy provides support and facilitate vaccinations to vulnerable population groups listed above.

WIP-PS - 6 - Workforce Incentive Program - Practice Stream

Activity Metadata

Applicable Schedule *

Core Funding

Activity Prefix *

WIP-PS

Activity Number *

6

Activity Title *

Workforce Incentive Program - Practice Stream

Existing, Modified or New Activity *

Existing

Activity Priorities and Description

Program Key Priority Area *

Workforce

Other Program Key Priority Area Description

Aim of Activity *

This activity aims to:

- understand current utilisation of WIP-PS in the region;
- identify and provide additional support to practices addressing gaps in WIP-PS knowledge;
- identify different models of multidisciplinary care supported by the WIP-PS to address community need, and the key factors that enable or inhibit these models and to share learnings;
- identify the range of activities nurses and allied health professionals undertake in primary care supported by the WIP-PS;
- increase general practice participation in WIP-PS;
- improve patient outcomes by improved access to multidisciplinary care in communities;
- identify best practice models of care supported by WIP-PS; and
- have general practices providing sustainable, quality multidisciplinary team care.

Description of Activity *

To understand and support the uptake of WIP-PS in the ACT, ACT PHN will:

- Identify general practices that are currently not receiving the WIP-PS. Of these general practices those currently employing WIP-PS eligible primary health care professionals will be prioritised for direct engagement to discuss and encourage uptake of the incentive. Other general practices not receiving the WIP-PS will then receive direct engagement to discuss the incentive and to encourage uptake.

- Support to participate in WIP-PS will be offered to general practices through direct engagement with the Quality Improvement team, development of a step-by-step guide/resource and educational events, if required
- Direct engagement with all general practices receiving WIP-PS to understand the primary health care professionals supported by WIP-PS at each practice, their model of care as well as any challenges and/or good news stories. Through this activity CHN will identify general practices with successful models of care and share their learnings through our various communication channels.
- Develop an information resource on all Practice Incentive Payments including the WIP-PS for use by general practices to reduce any gaps in knowledge about the incentive.
- Active collaboration with PHN Cooperative to share best practices, success stories and lessons learned.

Activity Number *

7

Activity Title *

PHN Commissioning of Multidisciplinary Teams

Existing, Modified or New Activity *

Existing

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description

Aim of Activity *

This activity aims to design an approach for multidisciplinary team services in the PHN region based on:

- Identification of, and consultation with, small or solo general practices or Aboriginal Community Controlled Health Services that are unable to engage a multidisciplinary team through other funding streams, and
 - a. Identification and prioritisation of areas of need in underserved or financially disadvantaged communities (such as treating chronic conditions and injuries, coordinating care for priority patients, mobilising social supports for at risk patients)
 - b. successfully commission multidisciplinary teams that address the prioritised need in the region
 - c. extend PHNs existing role in general practice to support to private allied health, nursing and/or midwifery practices
 - d. establish reporting processes supported by data collection and data management practices, including both activity and outcome measures
 - e. monitor implementation of the activity, utilising relevant outcome measures, and develop adjustments to the approach if required.

Description of Activity *

CHN will identify eligible small or solo practices and Aboriginal Community Controlled Health Services (ACCHS) across the Canberra region and co-design a multidisciplinary approach to manage Diabetes. CHN will utilise data and practice engagement to support understanding of the practice needs and commission a Multidisciplinary team that will support practices identified. CHN will additionally work with Allied Health peak bodies for a baseline service model. There will be a co-design review among CHN,

selected practices, and commissioned MDT to offer free diabetes services (allied health) to patients at-risk of diabetic complications. CHN will also collaborate with providers such as the Diabetes ACT and CHS to determine pathways for self-management of patients enrolled in the program.

This activity aims to:

- See an increase in general practice accreditation
- See improvements in safety and quality in health care, and
- See improved access of general practice to Commonwealth funded programs such as MyMedicare.

Description of Activity *

ACT PHN supports general practices to maintain or achieve accreditation through:

- Upskilling of Quality Improvement team members and regular engagement with accreditation agencies to enable them to provide specific support on accreditation to general practices.
- Development of a fact sheet on accreditation for unaccredited general practices. A detailed MyMedicare webpage on the CHN website.
- Identifying general practices currently unaccredited and engaging with them directly to discuss accreditation, promote the benefits and understand their barriers to participation. Support will be provided by the Quality Improvement team to practices as required.
- Direct engagement with each accredited general practice discussing and promoting accreditation and MyMedicare and offering support if required.
- Regular newsletter articles promoting MyMedicare and aspects of accreditation.

9

Activity Title *

General Practice in Aged Care Incentive (GPACI) – GP Matching

Existing, Modified or New Activity *

Existing

Activity Priorities and Description

Program Key Priority Area *

Aged Care

Other Program Key Priority Area Description

Aim of Activity *

This activity aims to:

- In collaboration with stakeholders, develop processes for matching RACH residents with an appropriate preferred GP offering MyMedicare services
- Work with the ACCH to develop culturally safe and appropriate pathways for First Nations RACH Residents
- Support practices, GPs, ACCH & RACHs to improve communication, processes and build capacity to operate within GPACI guidelines

Description of Activity *

Map existing relationships and gaps between GPs and RACHs in the ACT. Support RACHs to understand the GPACI and how to support their residents to access and benefit from this by providing information and in-reach support.

Work with the ACCH, General Practices and GPs to support their understanding of GPACI and opportunities to commence, improve or expand provision of care in RACH settings.

Educate the ACCH, general practices and GPs participating in GPACI on the application of the best practice guidelines .

Identify general practices and GPs wishing to participate in GPACI and support them with registration to MyMedicare and GPACI.

Provide GP matching for RACHs with new or exisiting residents in need of a new GP where there is not a suitable option available.

Support RACH, the ACCH and GPs to create/improve effective working relationships, inductions for new GPs to RACH and build sustainable partnerships between the stakeholders.

Promote opportunities for after-hours service provision.

Activity Title *

In-reach services for priority populations

Existing, Modified or New Activity *

Existing

Activity Priorities and Description

Program Key Priority Area *

Other (please provide details)

Other Program Key Priority Area Description

At risk populations

Aim of Activity *

The aim of this activity is to provide access and links to primary health care services for vulnerable people who are often characterised by poor access and low engagement with primary health care services.

ACT PHN Needs Assessment identifies an ongoing need for in reach primary health care services to enable accessible and appropriate care to vulnerable people within the ACT, with identified target populations being people exiting the prison system, people living in supported accommodation and people at risk of homelessness.

Description of Activity *

In/out reach services are those that are delivered directly to the targeted community and may be effective in linking vulnerable groups to mainstream health care.

- Directions' integrated AOD primary care and counselling/case management outreach and in-reach services provide wrap around, responsive health care to vulnerable Canberra populations. The services utilise a drop-in arrangement, optimising practitioner time and the clinics' accessibility to clients. Clients have often not previously accessed health care for lengthy periods, despite having complex needs for many years prior to engaging with the service, due to stigma, previous negative help-seeking experiences and challenges navigating the health care system.

- The service also includes Pathways to Assistance and Treatment (PAT), Directions' mobile clinic. 'Chat to PAT' is a purpose built mobile clinic that provides wrap around support to marginalised Canberrans who can't easily access health services, including people who are homeless or experiencing severe disadvantages. This service is provided by a multi-disciplinary team which

includes GPs, nurses, counsellors and mental health practitioners. The team provides primary health care, mental health care, drug and alcohol support and case management. It also offers after hours service (5-9pm) one day per week.

- In 2024 - Outfitting of a second mini-Pat van was completed. This will enable Direction to offer more flexible mobile services to different locations and in the after hours period.

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description**Aim of Activity ***

Commission Social Workers in GP to address specific gaps in service, emerging needs, and health priorities and commission associated evaluation and toolkit development

Description of Activity *

ACT PHN's social workers in general practice pilot was delivered and evaluated to measure the impact of the program on patients, practices, and the broader health system. The program was extended through core flex funding to run until 30 June 2026. Continuation of this model of care will incorporate the findings from the initial evaluation to further support understanding of the return on investment associated with the model. CHN will also commission a provider to develop a comprehensive toolkit for general practices hiring social workers. The toolkit will provide clear practical guidance including workforce planning considerations, recruitment, onboarding, role descriptions, funding options, supervision and training frameworks, and integration strategies and policies to support general practices through the end-to-end process of incorporating social work into their care teams and expand pilot to other general practices.

The aim of this activity is to support primary health care providers to deliver high quality care; build capacity and capability within general practice, improve integration of care, and foster the development of sustainable workforce and service delivery models to meet the future demand for primary health services.

Description of Activity *

ACT PHN undertakes a collaborative approach to supporting local primary health care providers and building their capacity to provide evidence-based care. This includes a focus on quality improvement and supporting high-performing primary care through:

- Data-driven quality improvement projects

- Supporting the workforce through a range of initiatives including continuing professional development, interdisciplinary education opportunities, early career supports, and ongoing professional networking opportunities.

- Providing resources and information about business processes such as accreditation and digital health.

The activities delivered alongside general practice support their engagement in the PIP QI and ensure they are meeting their QI requirements.

- Ongoing strengthening and management of data governance systems and protocols including maintenance of ISO27001 certification.

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description**Aim of Activity ***

The aim of this activity is to undertake planning and data analysis activities including population health data analysis, consultation, and policy analysis to identify community health needs and effective solutions.

Description of Activity *

ACT PHN aims to improve the health and wellbeing of people in the ACT while addressing inequities among and between specific population groups and the needs of the most disadvantaged. It is used to identify health needs, risk and protective factors, service gaps and the effects of targeted interventions.

- Source and analyse data to provide information about the health status of the ACT population with a focus on primary health care and to identify the key health issues/needs and problems
- Identify the population groups or localities most affected and identify the social determinants at play and/or the health inequities present
- Assess the adequacy of present efforts to meet current and future needs
- Identify gaps in programs and services and opportunities to improve coordination and collaboration with general practice, other primary health care providers, and the acute sector.
- Develop innovative workforce models that improve the delivery of primary care
- Plan for primary health care services
- Monitor and evaluate contracted services to determine progress towards achieving expected outcomes.

This activity aims to enable better system integration across primary, secondary and tertiary care.

Description of Activity *

Under this activity, ACT PHN will undertake a range of initiatives in collaboration with key health systems partners such as ACT Health, Canberra Health Services, and Calvary Hospital.

- Supporting integrated models of care. Initially, these activities will focus on mental health, Indigenous health, and digital health.
- Collaborative commissioning with ACT Health.
- Enabling the uptake of digital health tools.
- Establishment of CHN Data Governance Council and Data Governance Framework which will inform and guide how the organisation will improve data skills, implement security controls, and improve the use of customer relationship management and data storage systems.

The primary aim of this Activity will support the implementation and integration of a local clinical referral pathway program (HealthPathways) in the ACT PHN region.

The secondary aim of this Activity is to support the facilitation of relevant work plans submitted for the Aged Care Clinical Referral Pathways, Dementia Support Pathways and Dementia Consumer Resources Activities.

Description of Activity *

Allocate Core funding as per the Policy Guidance towards the HealthPathways program as the Clinical Referral Pathway platform for the ACT region to support the enhancement of clinical and referral aged care and dementia care support pathways for primary health care professionals in the region. (Including platform licence fees).

Promote the utilisation of HealthPathways as the local platform for Clinical Referral Pathways to local practitioners.

Integrate the HealthPathways platform within PHN activities as appropriate, particularly for aged care and dementia.

Collaborate within relevant networks to ensure Clinical Referral Pathways reflect the local health environment and offer support to local practitioners in relation to aged care and dementia.

Collaborate within the national PHN network to support the facilitation of Aged Care and Dementia Pathway Project activities as per the Policy Guidance.

Facilitating project governance of aged care and dementia pathway work under the policy guidance.

Provide resourcing to facilitate the activities under the work plan for the Aged Care Clinical Referral Pathways Activity.

Provide resourcing to facilitate the activities under the work plan for the Dementia Support Pathways Activity.

Provide resourcing to facilitate the activities under the work plan for the Dementia Consumer Resources Activity.

The priorities of the HealthPathways program are informed by the funding stakeholders and the local health needs assessment. For the 2025-2026 reporting period resourcing is also allocated to facilitate clinical referral pathway activities in the areas of, mental health, palliative care, chronic conditions, women, DFSV and older people.

Close collaboration with local tertiary stakeholders has been focused on facilitating optimal referrals including the inclusion of outpatient service criteria and promotion of eReferrals.

Close collaboration with other HealthPathways programs to develop and maintain multiple statewide and national lead region Pathways.

Personalised accounts were rolled out from 30 October 2024 and the milestone of registering 1,000 users with personal accounts has been reached by 11 July 2025.

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description**Aim of Activity ***

The primary aim of this Activity is to develop and review clinical and referral dementia care support pathways for primary health care professionals that reflect best practice on the ACT & SNSW HealthPathways platform. The secondary aims of this activity are to engage in collaborative activities across the PHN regions and with Dementia Australia in the development and sharing of dementia specific support pathways information, consult local primary care providers on the provision of dementia care within the ACT region and encourage the engagement with HealthPathways and usage of the dementia support pathways.

Description of Activity *

Allocate a dedicated GP clinical editor to review and develop relevant clinical dementia support pathways on the ACT & SNSW HealthPathways site. The dedicated GP clinical editor will work in collaboration with PHNs participating in the Activity to share dementia support pathways information

Consult with local primary health care professionals in an effort to gain further understanding of the provision of dementia care within primary health care settings in the ACT.

Consult with local primary health care professionals in an effort to identify barriers in the provision of dementia care and their informational needs when supporting patients living with dementia and their carers.

Continually review the relevant dementia support referral pathways in collaboration with local health care providers, dementia support groups and community services.

Partner with Dementia Australia and local ACT representatives to ensure dementia support and referral pathways reflect appropriate services and supports and consult with consumers living with dementia and/or their carers/family in an effort to gain further understanding of their experiences in the ACT health system and how their care could have been improved.

Engage in communication strategies to promote the awareness and usage of the developed/reviewed dementia support pathways on HealthPathways.

Support educational opportunities for health care professionals within the ACT for the provision of dementia care and the support of carers.

Activity Priorities and Description

Program Key Priority Area *

Population Health

Other Program Key Priority Area Description**Aim of Activity ***

The primary aim of this Activity is to review and develop clinical and referral aged care support pathways for primary health care professionals that reflect best practice on the ACT & NSW HealthPathways platform. The secondary aims of this Activity are to support initiatives being undertaken by the ACT PHN under the Aged Care Funding such as, Telehealth, early intervention initiatives to support healthy ageing, the ongoing management of chronic conditions and the Care Finder Program.

Description of Activity *

HealthPathways GP clinical editor/s to review and/or develop clinical pathways for Older Adults informed by local needs, clinical gaps on the HealthPathways platform and the direction provided within the Aged Care Funding Policy Guidance.

Continually review the relevant aged care referral support pathways in collaboration with local health care providers, aged care support groups and community services.

Engage in communication strategies to promote the awareness and usage of the developed/reviewed aged care support pathways on the HealthPathways platform.

Review and/or develop clinical and referral support pathways as required on the HealthPathways platform to support best practice care for chronic conditions.

Update clinical and referral support pathways as required on the HealthPathways platform to support best practice care for carer stress and support.

The ACT & NSW HealthPathways program is the lead region for the Telehealth pathway to support the usage and understanding of Telehealth with HealthPathways users and lead the maintenance of this pathway for HealthPathways programs across the ACT and NSW regions. Support the implementation of the Care Finder Program by providing the relevant information of the HealthPathways platform and engaging in communication strategies to promote the awareness and referral to the commissioned service providers.

The ACT & NSW HealthPathways program is also the national lead region for the Chronic Condition Management Items pathway to support the preparation and review of General Practice Chronic Condition Management Plans and accessing allied health services. The page also provides information on GP contributions to multidisciplinary plans for residents of residential aged care homes. This page supports best practice care for chronic conditions for older adults.

Other Program Key Priority Area Description**Aim of Activity ***

The primary aim of this activity is for HealthPathways team within the ACT PHN is to map local dementia services, develop and promote and distribute dementia resources for people living with dementia and their carers. These resources were developed by HealthPathways team during 2023-24 in consultation with people living with dementia and their carers. The activity aims to promote these resources to consumers, carers and health professionals to raise awareness of local services and supports within the region.

Description of Activity *

'Collaborate with local health care providers, dementia support services, advocacy organisations and community services to provide accurate information on their services within the developed consumer resources.

Consult with Dementia Australia (ACT) and Health Care Consumers' Council (HCCA) employees as representative bodies on the informational needs of consumers and carers and the appropriateness/usefulness of the developed consumer resources.

Engage in communication strategies to promote the awareness and usage of the developed dementia support consumer resources through inclusion in educational events and news outputs.
